

U.S. Department of Commerce
BUREAU OF THE CENSUS

Titanium Mill Products, Ingot, and Castings

JUNE 1983

ITA991(83)-6

Issued September 1983

The statistics in this publication are based on a survey of manufacturers and represent total U.S. shipments of titanium mill products, ingot, and castings. Estimates are included for companies whose reports were not received in time for

tabulation.¹ A description of the survey methodology and related information appears in the January 1983 report for this series, U.S. DEPT. OF COMMERCE, BUREAU OF THE CENSUS, ITA991(83)-1, issued May 1983.

Table 1. NET SHIPMENTS OF TITANIUM MILL PRODUCTS

(Thousands of pounds)

Product	June 1983	May 1983	June 1982
Total ¹	2,640	2,691	3,166
Sheet and strip.....	(2)	(2)	(2)
Plate.....			
Forging and extrusion billet.....	1,364	1,183	1,701
Rod and bar.....	412	310	353
Fastener stock and wire.....			59
Extrusion.....			
Pipe and tubing.....	864	1,198	
Other.....			1,166

¹Net shipments, total, is the sum of mill product shipments plus mill products consumed in the manufacture of fabricated products, less total receipts. Net shipments for each mill product category also includes the consumption of mill products in that category in the manufacture of other mill products. Detail may not add to the total because of this difference in definition.

²Data for sheet and strip, plate, extrusion (other than tubing), pipe and tubing, and other have been combined to avoid disclosing individual company data.

Table 2. TITANIUM INGOT, MILL PRODUCTS, AND CASTINGS: 1982 TO 1983

(Thousands of pounds)

Month and year	Ingot				Mill products			Castings

(Z) Less than one-half of 1 percent.

¹ For a comparison of Standard Industrial Classification (SIC) codes, Schedule B export numbers, and TSUSA import numbers, see table 4 in the January report ITAS91(E) p. 1, line 1.

² Source: Bureau of the Census report EM 546, U.S. Exports.

³ These values were derived by use of adjustment factors to exclude freight, insurance, and other charges incurred in moving goods to the port of export. This adjustment is made to convert the values to an approximation of the producers' value of exported goods. Current adjustment factors are based on data for 1981 which are published in *Origin of Exports of Manufactured Products, MBI(AS)3*, appendix B. Comparable adjustment factors for earlier years are based on similar factors developed for 1971 and 1972. The current adjustment factor for this report is 0.9731.

⁴ Source: Bureau of the Census report EM 145-3, U.S. Imports for Consumption and General Imports.

⁵ The value includes c.i.f. (cost, insurance, and freight) at the first port of entry in the United States plus U.S. import duties and other charges to the import point.

⁶ Apparent consumption is derived by subtracting exports from the total of net shipments plus imports.

⁷ Comparability of output, export, and import classifications for ingot and billet assume that bloom, sheet bar, and slab are reported as ingot or billet in the output numbers. Figures for imports of ingot and billet also include powder, crystal, and similar forms which are excluded from the output and export numbers.
